# Release Notes

**VERSION:** V.1.0.0.43022

**Release date:** Wednesday, December 20, 2017

## ENHANCEMENTS & NEW FEATURES

Ref#	Summary	Description	Configuration Required (Yes/No)
MRK-5136	Create Multiple Billing Address Messages	The billing warning message on the credit card payment method has been updated to indicate the merchant account name that will be reflected on credit card statements. The current message will remain in place until the merchant name is configured on a site.	Yes
MRK-1059	External URL for Footer page	This is an existing built-in functionality allowing to create a link to some other content on the same website or on an external website. See documentation for configuration options.	Yes
MRK-5087	No download button for free xmpie download without approval	Users are now able to download a digital version of their customized product right away if the selected customization values do not require approval.	No
MRK-4753	Independent Product Level Approvals	Orders going through product level approval workflow will now be processed partially after one or more items get rejected. Order subtotal as well as tax charge, shipping and applied discounts will be recalculated accordingly.	No
